

# Evelyn Wood—Read Faster, Remember More

## Speed reading, vocabulary and memory skills

According to Indeed, the average person can read between 200-250 words per minute, while the ability to speed read greatly increases this number. What does this mean for you and your organization? Not only can speed reading help manage your schedule and increase productivity, but it also helps sort through information to make understanding and comprehension less overwhelming.

This half-day course provides the opportunity to develop critical thinking skills as you learn to read faster, while comprehending and remembering more. Information is everywhere and technology has contributed to the overwhelming amount of information available. As business professionals, the ability to sift through all information by reading faster and remembering more enhances our ability to make better decisions, manage our time and contributes to success at work.

Evelyn Wood Reading Dynamics® offers an indispensable seminar for all businesspeople. Learn different speed reading techniques, improve your cognitive flexibility and benefit from increased memory and comprehension skills. This course offers the tools to sharpen your reading skills and make you a more dynamic leader and learner.
